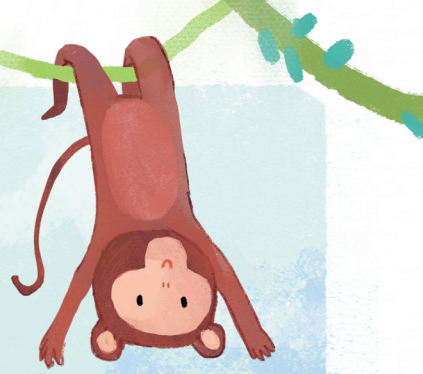
YOU ARE CREATIVE JUST THE WAY YOU ARE



Meet **creativity**, the friend you thought you had lost.
Creativity is a way of life.
It's essential to who we are as human beings.
We feel limited, stuck, and trapped when creativity is absent from our lives.

Creativity means being **curious** at all times.
The mistake we often make is thinking that creativity means "artistic"
In reality, creativity comes in multiple forms.
It is the act of thinking differently.

Truth be told, we are probably expressing different
forms of creativity every single day.
It's just that we don't always see it.
Because creativity isn't **logical**.
Creativity is curious.

The manifestations of our creativity are as **unique** as our personalities!
The more you know about yourself, the easier it is to
reconnect with your creativity.
Creativity is a way of seeing possibilities when others see limits.
You are limitless and free when you live creatively.

Creativity is with you already, even if you don't realize it.
Creativity is a mindset.
Develop your creative **mindset**.
Play with creativity whenever you can.

Building that genuine trust to encourage creativity
requires patience and an open mind.
Diversity ignites creativity because more perspectives
result in more possibilities.
Creativity is contagious and creates a ripple effect.

You are **limitless**.
You are creative just the way you are.
